- ...All Under a Per Employee Per Month Utility Pricing Model**

Aspirin for your IT headaches.

"Finally, my network isn't a not work."

Case Studies

- **New Technology – Restoration**

- Over a 30 day migration period, they replaced three outdated servers, and 70 aging PCs with various versions of Microsoft Office.
- An upgrade that would have cost over \$100,000!

- **Security – Healthcare**

- Home health organization with nurses and field consultants, have locked down their data.
- Now remote employees can have access to Personal Health Information (PHI), without the risk of stolen or lost laptops causing potential HIPAA violations.

The logo for 'effortless24.7' features the word 'effortless' in a dark grey sans-serif font, followed by '24.7' in a larger, bold, light green sans-serif font. A green feather icon is positioned above the '7'. A dotted line curves from the top right of the feather towards the left, ending above the '24.7'.

Look us UP before your network goes DOWN

Aspirin for your IT headaches.

"Finally, my network isn't a not work."

What does that mean to our clients?

- **New Technology**-100% new hardware and software, including upgrades with \$0 capital investment.
- **Accessibility**-Employees can now access their desktop from work, home, client's offices, coffee shops, airports, tablets, phones...
- **Continuity**- Everything with a drive or a fan dies eventually, but now all data and applications are backed up in multiple data centers, and their employees are desktop independent. Disaster? No worries! It is biz as usual!
- **Security**- All computers and servers reside in a redundant Enterprise Data Center with 24/7 physical monitoring, video surveillance, biometric access and diskless workstations so no data can reside on-site.

effortless24·7™

Look us UP before your network goes DOWN

Aspirin for your IT headaches.

"Finally, my network isn't a not work."
